

Wajahat Gul

AI Engineer — Python Developer — Backend Developer

Islamabad, Pakistan

 [linkedin.com/in/wajahatgul98](https://www.linkedin.com/in/wajahatgul98) ·  +92 318 5419281 ·  wajahatgul2793@gmail.com

PROFESSIONAL SUMMARY

AI Engineer specializing in RAG pipelines, LLM integration, and backend automation. Delivered production WhatsApp chatbots, end-to-end ML systems, and workflow automation tools that reduced manual effort across multiple client projects. Skilled in prompt engineering, vector search, and scalable API development.

EDUCATION

Bahria University

Bachelor of Science in Computer Science

Islamabad, Pakistan

Dec 2022 – Dec 2026

F.G. Degree College for Men

Intermediate, Pre-Engineering

Wah Cantt, Pakistan

Aug 2020 – Aug 2022

EXPERIENCE

Data Analyst Intern

Dec 2025 – Jan 2026

Excelerate (Remote)

Dubai, UAE

- Led a team as group leader, coordinating tasks and collaboration across members via Google Chat for a remote data analytics project
- Performed end-to-end data preprocessing, cleaning, and transformation on Excel datasets, ensuring data quality for downstream analysis
- Conducted exploratory data analysis and feature engineering to extract meaningful insights, and built visualizations to communicate findings effectively

AI/Automation Intern

Jul 2024 – Sep 2024

Y&M TechWorks

Punjab, Pakistan

- Engineered multiple Python automation workflows for client-facing and backend processes, significantly reducing manual processing time across operations
- Developed and deployed production RAG chatbots with LLM integration and prompt engineering, improving customer query resolution efficiency for multiple clients
- Automated multiple repetitive admin workflows using Selenium and n8n, eliminating manual errors and cutting task execution time by a significant margin

Competitive Team Member

Jan 2025 – March 2026

YOTA – Youth Organization for Technical Advancement

Islamabad, Pakistan

- Competed in multiple coding competitions and co-delivered Python and AI training sessions to many junior members, building both competitive and community technical skills

SKILLS & TOOLS

Languages & Backend: Python, C++, JavaScript, SQL, Django, FastAPI, REST APIs, Database Management

AI & ML: RAG Pipelines, LLM Integration, Prompt Engineering, NLP, Machine Learning, Feature Engineering, Scikit-learn, LangChain, OpenAI API, Groq API, Vector Databases (ChromaDB)

Tools & Automation: Selenium, n8n, WhatsApp Business API, Pandas, NumPy, Git, GitHub, Docker, Jupyter Notebook

PROJECTS

GitHub: github.com/WajahatGul

ResearchSense – AI Research Publications Dashboard

FYP

- Architected an end-to-end RAG pipeline using LLM and vector search to analyze multiple research publications, enabling semantic Q&A over large document collections
- Implemented advanced PDF chunking, embedding generation, and vector retrieval, improving query relevance across many document types
- Integrated Groq API for faster LLM inference, reducing response latency compared to standard endpoints

RAG Chatbot Integrated with WhatsApp

Y&M TechWorks

- Led full-stack development of a production RAG sales assistant integrated with WhatsApp Business API, serving multiple real estate clients with automated LLM-powered responses
- Designed automated n8n workflows connecting OpenAI API, vector search, and WhatsApp, resolving many client queries without human intervention

WhatsApp Group Management Automation

Y&M TechWorks

- Built a Selenium + Pandas automation system managing multiple WhatsApp groups with bulk Excel imports, eliminating manual admin errors and saving many hours of work per week

PSL Cricket Prediction System

Semester Project

- Developed a Django ML web app predicting match outcomes, batsman runs, and bowler wickets using Scikit-learn models trained on historical PSL data
- Engineered 50+ cricket-specific features via feature engineering and data analysis, achieving strong predictive accuracy across all three models
